20m Telephoto
Camera

RedEye

REMOTE Trigger

RedEye REMOTE
enables covert
surveillance from
a distance

Extend the capability of your RedEye security cameras with RedEye REMOTE

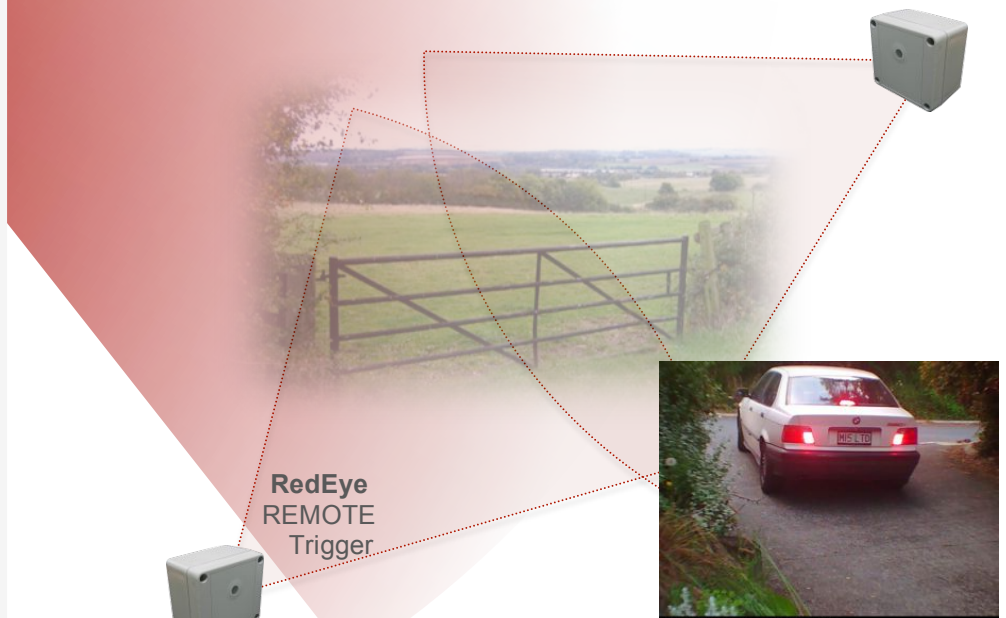

RedEye REMOTE enables complete flexibility in your surveillance operation

- REMOTE Triggers are an ideal complement to the RedEye telephoto cameras – position the REMOTE Trigger in close proximity to the target with your camera at a distance
- Select the appropriate number of REMOTE Triggers to capture the target as it enters the camera's focus area from any direction

RedEye REMOTE features

- Unsurpassed battery life with solar options for continuous power
- Up to 80m between RedEye REMOTE devices and the RedEye camera (can be extended up to 1km)
- One camera can be activated by up to 60 RedEye REMOTE Triggers
- One RedEye REMOTE Trigger can activate unlimited RedEye cameras
- RedEye REMOTE uses high frequency wireless communications with high security addressing

Note: RedEye cameras require a REMOTE Expansion Board to be installed in the camera in order to communicate with the RedEye REMOTE Kits.

RedEye
REMOTE
Trigger

RedEye REMOTE Trigger

a standalone motion sensor that will remotely trigger your RedEye camera from up to 80m away

Create a networked environment between multiple cameras and triggers

Customise your surveillance architecture with the flexibility of RedEye REMOTE

Unmatched low power technology delivering many months of continuous operation

Also available: RedEye REMOTE NightVision providing a REMOTE standalone night vision spotlight
