

Digital Surveillance Camera ideal for Vending Machines, Kiosks, ATMs and Ticketing Machines

Detects physical attacks and captures high resolution images in colour or mono

Integrated omni-directional tilt and vibration sensor

Easily mounted anywhere behind the machine's front panel – requires only one small hole for the pin hole lens

Optional integrated ultra bright infra-red LED to illuminate area in front of the machine in low light conditions

Security images can be instantly reviewed on any computer

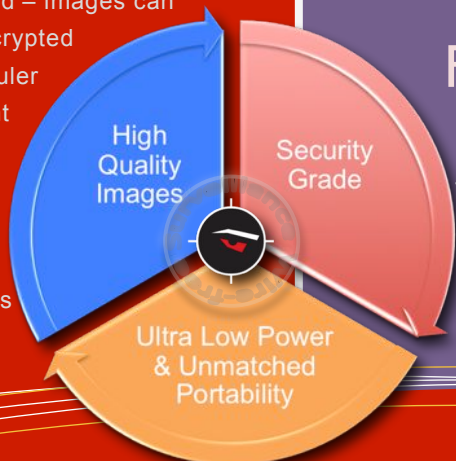

Ultra low-power security

- Patented ultra low-power technology enables unmatched performance on rechargeable battery
- VendingEye can be powered by the vending machine, whilst a backup battery enables continuous operation

Captures high resolution still images

- Programmable image sequence
- Time & date stamped with digital signature
- Pre-trigger records images before the camera whole is blocked
- Privacy ensured – images can be digitally encrypted
- Flexible scheduler for independent arming and disarming of camera
- Capture 210,000 images on removable storage

VendingEye

The next generation in security and surveillance systems for unattended equipment

Patented low power design, continuous operation day & night

Captures high resolution images when equipment is attacked

Fully automatic operation

A revolution in portable surveillance

The ultra low-power "Eye Series" cameras are the first to incorporate PSIS, a technique where a surveillance camera operates between CCTV & Digital Still Camera modes. This allows critical images of events (attacks, vandalism, thefts, and terrorism) to be captured and stored in high resolution without the usual degradation in quality of CCTV still images.
